EDUCATION

1337 Coding School, IT architect	Nov 2021 - present
University of Ibn Tofail, Computer Science	Nov 2020 - Jul 2021

WORK EXPERIENCE

Software Developer, UM6P Oct 2024 - present

- Built **StartGate**, a Moroccan startup ecosystem platform connecting startups, experts, investors and events, now serving **15K+ users, 2K+ startups and 10K+ teams**.
- Added calendar/booking and matchmaking features so program managers can connect mentors and experts with startups, replacing a paid external platform and **eliminating its yearly subscription cost**.
- Developed a **page builder** that lets program managers create and publish program pages inside the dashboard.
- Building a **multi-tenant SaaS dashboard** for managing startup programs.
- Delivered the Startup Campus and startup program landing pages, plus a deep tech event website with an admin dashboard for attendance, invitations and dynamic content.

Software Developer Intern, UM6P Fev 2024 - Jul 2024

- Built a deep tech event website with improved accessibility and registration.
- Developed an intranet platform starter for internal use.
- Replaced Excel workflows with a **RESTful APIs** and filtering system linked to a **PostgreSQL** database.

Freelance Full Stack Developer (Next.js / Supabase)

- Delivered client platforms including a fasting-hike app, a crypto tracker, automation tools and a dance-studio management system.
- Built end-to-end solutions with **Next.js, React, Supabase and TypeScript**: authentication, API integrations, automation workflows and webhooks
- Supported clients from development to launch, helping them onboard their **first paying customers**.

PROJECTS

iOS Apps | Published on the App Store ↗

- Designed, built and published multiple iOS apps available on the App Store

Pressmanai: AI Marketing Automation ↗

- Multi-channel content publishing platform (**Next.js, Supabase, TypeScript**) with a scalable background job system using **Redis** and **BullMQ** for schedules and distributed cron jobs.

Real-time Multiplayer Ping Pong Game ↗

- Led a Scrum team building a game with authentication, chat, matchmaking and profiles using **NestJS, React and PostgreSQL**.
